

Daliya Safdar Ahmed

Computer Science with AI student

Projects Portfolio

Web Developer

Student Association, University of Nottingham,
March 2024 to June 2024 (3 months)

Software used: Webflow, Figma

Link: <https://www.sanottingham.org/>

- created a new web page for all the new, current, and previous handlers of the website
Link: <https://www.sanottingham.org/web-developer-template>
- Maintained the website and ran through all the issues it encountered.
- Changed the weekly events to keep the website up-to-date with all the new information.
- Helped with creating and implementing a calendar feature and weekly updating it on the google calendar. **Link: <https://www.sanottingham.org/help-pages/events>**
- Added photos to the photo gallery. **Link: <https://www.sanottingham.org/photo-gallery>**

Dalia's Za'atr website project

Database assignment in my First year of University of Nottingham.

Software used: HTML, CSS, JS, PHP, SQL

- This online food ordering system streamlines ordering, enhances customer experience, and improves restaurant efficiency. The two-sided website lets restaurant employees manage orders and update menu items, while customers can browse the menu, place orders, and manage their accounts.
- The purpose of this online food ordering system is to create a user-friendly application that allows customers to easily place orders online. The system aims to streamline the ordering process, enhance customer experience, and improve operational efficiency for the restaurant. It's a two-sided website: one side is accessed by the restaurant employees to manage orders and update menu items, and the other side is for customers to browse the menu, place orders, and manage their accounts.
